Solution

VERSIONING	
1	Released
2	Correction instruction for 6.00 release updated. Customers with this release need do apply this SAP Note again.

The new **Cret@: Ficheros de Solicitud** (RPC_PAYES_REQUEST) report generates the **Solicitud de borrador**, **Solicitud de cálculos**, **Solicitud de confirmación**, and **Solicitud de trabajadores y tramos** files.

General information about the report operation

- Selection Screen

- **Cód. cuenta de cotización** (S_CCC) field: this data fills the **CCC** tag in the XML file. This field search help displays all **CCC** available in **Divisiones y subdivisiones de personal** (T5E01) and **Características dependientes del tiempo de CCCs** (T5E08) tables. Note that if you select one **CCC** in this field, its secondary **CCC** will not be automatically added to the generated file. You should explicitly add each **CCC** that needs to be considered by the report in this selection option.
- **Periodo de liquidación** (P_MBEG, P_YBEG, P_MEND, P_YEND) field: this data fills the **PeriodoDesde** and **PeriodoHasta** tags in the XML file. These dates will be used for all **CCC** selected in **Cód. cuenta de cotización** field.
- **Tipo de fichero** (P_FILETY) field: This field determines which file will be generated: **Solicitud de borrador** (1), **Solicitud de confirmación** (2), **Solicitud de cálculos** (3), and **Solicitud de trabajadores y tramos** (4).
- **Clave de autorización** (P_AUTKEY) field: this data fills the **Autorizado** tag in the XML file. This field will be automatically filled according to **Clave de autorización para el sistema RED** (AT_CRETA_AUTH) HR Attribute customizing.
- **Referencia externa** (P_EXTREF) field: this data fills the **ReferenciaExterna** tag in the XML file.
- **Fecha de control** (P_CONDA1, P_CONDA2) field: this data fills the **FechaControl** tag in the XML file. It is mandatory to fill this field if you select the **Complementaria abono salarios carácter retroactivo** (L03) **Tipo de liquidación** (P_LIQTYP).
- **Tipo de liquidación** (P_LIQTYP) field: this data fills the **Tipo** tag in the XML file.
- **Aceptar bases anteriores** (P_ACPTBA) field: this checkbox fills the **AceptarBasesAnteriores** tag in the XML file. It indicates that bases of the last month should be applied in the current month liquidation. It can only be used with **Solicitud de borrador** file and **Liquidación normal en período reglamentario de ingreso** (L00) **Tipo de liquidación**.
- **Periodo de presentación** (P_PREPE1, P_PREPE2) field: this data fills the **FechaPresentación** tag in the XML file. It can only be used with **Solicitud de cálculos** file.
- **Cálculos desglosados** (P_BDCALC) field: this checkbox fills the **IndicadorCalculosDesglosados** tag in the XML file, indicating that the answer to this request will be split by employee and interval (**Tramo**). It can only be used with **Solicitud de cálculos** file.
- **Generar fichero TemSe** (P_GENTMS) field: this checkbox indicates if the report generates a TemSe file or if it only displays the XML file in the log output.

• Output log

- **Mensajes generales:** technical messages related to tables that are not maintained or any other technical issue.
- **Fichero TemSe/XML:** list of all **CCC** that have been reported in the XML file, for information purposes. The **Razón Social** (T5E12-RAZON_SOC) of each **CCC** is the one informed in the **Asignación de centro para la Seg.Social** (T5E12) table. Note that the report generates one single file containing all the **CCC** and liquidations. The file can be seen through **Visualizar XML** button.

As general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.
2. Apply the manual post-implementation steps.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
