

Header Data

Released On	17.04.2015 21:35:14
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

Symptom

You run the **Cret@: fichero de bases** (RPC_PAYES_CRETA_BASES) report with the **Reportar diferencias** (P_DIFFER) option selected and you face one of the following issues regarding the **Período desfasado** (SPDES) customer option:

1. You have the SPDES **Desactivado** (00) option configured. An execution of the report should generate an additional settlement and it is not being reported.
2. You have the SPDES **Activado** (01) or **Activado, graba todos resultados** (02) option configured. An execution of the report should not generate an additional settlement but it is being reported.

Other Terms

&PDESASFASADO; &CRETA (further information see note 1071282)

Reportar diferencias

Reason and Prerequisites

The issue is caused by a program error.

1. RPC_PAYES_CRETA_BASES reports actual results from periods different than the on informed on the selection screen.
2. RPC_PAYES_CRETA_BASES reports differences based on results that has not been reported before, what does not make sense for the lagged period functionality.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.04	HR SP 66
6.00	HR SP A0

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Corrections to source code of the **Clase de lectura de nómina para periodo desfasado** (CL_HRPAYES_LAGGED_PERIOD) class have been provided to solve this issue:

1. If the employee has no result in the selected period, the report rejects all results of this employee.
2. The report rejects non current previous results.

VERSIONING	
2	Released

As general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
