Reason and Prerequisites

The issue is caused by a program error. The RPUFRAE0 report takes into account the **Fecha real** date from **Fechas de Alta Baja** (FAB) segment to search the employee related to the response.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 00
6.04	HR SP 68
6.00	HR SP A2

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Corrections to source code of **Incluir de rutinas del RPUFRAE0** (RPUFRME1) have been provided to solve this issue.

Now the RPUFRAE0 report uses the day before **Fecha desde** date from **Fechas de Control de Trabajadores** (FCT) segment to search for the referred entry from **Datos de mensaje .AFI** (0799) infotype. This changes are applied only for response files of MSA, ESA and ASA actions.

Be aware: In order to ensure the expected behavior of the report the entries in 0799 infotype should be created referring to the last day before the reported action.
