

Header Data

Released On	11.09.2015 20:47:06
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain
Priority	Correction with low priority
Category	Consulting

Symptom

This SAP Note provides you with the advanced delivery files for installing the **Gestión de Estados** (Status Handler) framework and for enabling the use of this framework by the **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report and by the **SLD: procesamiento de ficheros** (RPC_PAYES_CRETA_FILES) report. For more information, see SAP Note 2184688.

This SAP Note also provides you with advanced delivery files for installing the **Gestión de estados (ES)** (3393) infotype to be used by the **Gestión de Estados** (Status Handler) framework. For more information, see SAP Notes 2184579 and 2184688.

IMPORTANT: this note contains the advanced delivery files for manual installation of the following SAP Notes:

- 2180749 - SLD: Status Handler enablement for bases file report
- 2184159 - UTIL: Enhancements to exception classes
- 2184283 - SH: Dictionary objects for Status Handler Framework
- 2184284 - SH: Utilities classes for Status Handler Framework
- 2184579 - SH: Creation of Infotype 3393 for Status Handler Spain
- 2184688 - SH: Status Handler Framework
- 2188177 - SLD: Files Processing - Status Handler enablement for Response file

Other Terms

&SH; &SLD (for more information, see SAP Note 1071282)

Reason and Prerequisites

You have to apply SAP Note 2191561 (UTIL: Function module for Event ID search help) as a prerequisite.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 00
6.04	HR SP 70
6.00	HR SP A4

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

This note contains the advanced delivery files for the DDIC objects of the following notes:

VERSIONING	
4	Released
5	Correction Instruction validities revised

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.

Be aware of an Advance Delivery delivers the last version of the objects, it means that if you do not have the last HR Support Package installed in your system you could get errors, either Syntax Errors or process errors. In this case the only option is to undo the changes from Advance Delivery and do the changes manually according to the instructions in this note.

For more details about Advance Delivery installation procedure please read the notes listed in "Related Notes".

Risk and Restrictions inherent in Transport Files

If you use a Transport (SAR) file instead of installing the appropriate Support Package or CLC Package, please note the following:

- 1) Read carefully SAP Note 1318389, where conditions and risks of using Transport files are explained in detail.
- 2) There are no updates to Transport files when any object in them are modified. Objects contained in Transport files may become obsolete without warning.
- 3) Transport files are not valid once their content is available via Support Packages or CLC Packages. The changes may then be installed only via the Packages.
- 4) Text objects are provided in the language in which they were created. Translation is available only via the Packages.
- 5) Changes to the SAP Easy Access menu and Implementation Guide (IMG) are provided only via the Packages.

Caution: Handling Transport files

1. When you apply more than one Transport file, the order of implementation must be followed as indicated. A wrong sequence will cause transports to fail.
2. Once a Transport file has been installed, future installations of Support Packages (or CLC Packages for the HR components modified by the Transport file) must include the Packages that delivered the changes contained in the Transport file. Otherwise objects may be replaced by older versions.
3. If a Transport file contains customizing entries it must be imported in the client of the development system, in which you are normally creating your customizing changes. Otherwise the customizing will not be transported.

Manual Post-Implement.	
VALID FOR Software Component Release 608	SAP_HRCES Until SAPK-60818INSAPHRCES

1. Apply SAP Note **2191561** (UTIL: Function module for Event ID search help) as a prerequisite
2. Logon in **ES** language
3. Download and unzip the attached file **608_Workbench.zip**
4. Install the following files:
 - K053124.L8H
 - R053124.L8H
5. Download and unzip the attached file **608_Customizing.zip**
6. Install the following files:
 - K052999.L8H
 - R052999.L8H

Manual Post-Implement.	
VALID FOR Software Component Release 604	SAP_HRCES SAPK-60470INSAPHRCES - SAPK-60490INSAPHRCES

1. Apply SAP Note **2191561** (UTIL: Function module for Event ID search help) as a prerequisite
2. Logon in **ES** language
3. Download and unzip the attached file **604_Workbench.zip**
4. Install the following files:
 - K252599.L4H
 - R252599.L4H
5. Download and unzip the attached file **604_Customizing.zip**
6. Install the following files:
 - K252501.L4H
 - R252501.L4H

Manual Post-Implement.	
VALID FOR Software Component Release 600	SAP_HRCES SAPK-600A4INSAPHRCES - SAPK-600C4INSAPHRCES

1. Apply SAP Note **2191561** (UTIL: Function module for Event ID search help) as a prerequisite
2. Logon in **ES** language
3. Download and unzip the attached file **600_Workbench.zip**
4. Install the following files:
 - K289528.L7D
 - R289528.L7D
5. Download and unzip the attached file **600_Customizing.zip**

6. Install the following files:

- K289440.L7D
- R289440.L7D

Validity

Software Component	From Rel.	To Rel.	And Subsequent
SAP_HRCES	600	600	<input type="checkbox"/>
	604	604	<input type="checkbox"/>
	608	608	<input type="checkbox"/>
