## Symptom

You run the **Mensaje de Afiliación** (RPCAFIE0) report and find one of the following symptoms:

1. You run the report with the **Utilizar automatismos** (S\_AUTOM) option selected for an employee with consecutive partial strike days with different Días de absentismo/presencia (ABWTG) values informed in the Absentismos (2001) infotype. Instead of generating the Datos de mensaje AFI (0799) infotype entries corresponding to each different Coeficiente de actividad en caso de huelga parcial (COEF\_HUEL) value, the report is gathering those strike periods.
2. You have an implementation for the **Badi Mensaje de Afiliación (AFI)** (HRPAYES\_AFIE0) BAdI. When generating the AFI file, the header of the **Fechas de Alta y Baja** (FAB) segments is replaced with the header of the **Otros Datos** (OTD) segment.

## Other Terms

Automatismos, partial strike, huelga parcial, PC00\_M04\_MENS\_AFI

## Reason and Prerequisites

The issue is caused by a program error.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 01
6.04	HR SP 72
6.00	HR SP A6

(For more information, click on "R/3 HR Support Package Schedule" in [www.service.sap.com/ocs-schedules](http://www.service.sap.com/ocs-schedules).)

## Solution

1. Now, consecutive partial strike days with different part time coefficient will generate different 0799 infotype entries.
2. The return of the UPD\_OTD\_DATA method no longer overwrites the FAB segment.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [service.sap.com/note-assistant](http://service.sap.com/note-assistant).
