

Header Data

Released On	06.11.2015 15:26:45
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Program error

Symptom

The following symptoms were identified in report **SLD: Bases File** (RPC_PAYES_CRETA_BASES):

- You have the **Periodo desfasado** (SPDES) customer decision marked as "SLD active" (OPTNU = 3). This causes the checkbox parameter **Grabar estados infotipo 3393** (P_SAVESH) to only be checkable if the **Ejecución productiva** (P_LIVRUN) is also checked.
- You have installed the **Gestión de Estados** (Status Handler) framework, but did not activate it for the **Sistema de Liquidación Directa** (SLD) application in the **Especificar grupos y valores de atributo HR view cluster** (VC_T799BATTRIB03C). However, the P_SAVESH parameter is still visible.

Other Terms

&SLD; &SH; &PDESFASADO (for more information, see SAP Note 1071282)

Infotype 3393; Cret@; Fichero de Bases;

Reason and Prerequisites

For the first symptom, it was decided that a productive execution should not interfere in whether the 3393 can be saved or not. The second symptom is caused by a program error.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 03
6.04	HR SP 74
6.00	HR SP A8

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Changes to source code of the RPC_PAYES_CRETA_BASES report have been provided to solve this issue.

The P_SAVESH checkbox was moved to a new "Status Handler" interface block. The report's behavior is now the following:

- P_SAVESH is checkable regardless of the value of P_LIVRUN.
- In case Status Handler has been installed, and the **Aplicación SLD** (AT_SH_SLD) HR Attribute in the **Configuraciones de la gestión de status** (SH_CONFIG) attribute group is true, the Status Handler interface block is visible.

VERSIONING	
2	Released

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.

List of new/changed objects (manual activities related):

LIMU REPT RPC_PAYES_CRETA_BASES

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.

Manual Pre-Implement.
