The following Support Package level is the minimum prerequisite:

Solution

After this note is applied, messages related to employees that are not included in the generated Bases file are not shown in the application log.

There are some messages that explain the reason why the employee has not been included in the Bases file. Therefore, they must be shown in the application log even if the employee is not included in the application log. The standard delivery define the following messages as relevant for this criteria:

Número del mensaje	Texto del mensaje
606	CCC &1 no está contenido en el filtro de CCC en &2
610	No existen resultados de nómina en el cluster para el período &1 en &2
613	El CCC &1 ha sido procesado en el período &2
619	El resultado de nómina &1 del período &2 no tiene cc-nóminas a reportar
622	Concepto negativo &1 ha sido ignorado en el tramo desde &2 hasta &3
623	Ignorado tramo &1-&2 existente en resultado previo pero no en el actual
627	El resultado de PCL4 &1 del período &2 no tiene cc-nóminas a reportar
628	Empleado con cuotas fijas no tiene datos a reportar para &1 en &2
636	Empleado exento no procesado para el periodo &1
653	Tramo no generado para el período &1.

You can change the messages that are considered as relevant for all cases by changing the customizing for the **Todos los mensajes que deben ser expuesto para un empleo, mismo sin tramos** (AT_SLD_MSG_RELEV) HR Attribute accessing the VC_T799BATTRIB01 view cluster via transaction SM34.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.
