

Header Data

Released On	28.01.2016 18:54:52
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

Symptom

The following symptoms have been identified in the **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report:

1. A **Complementaria por vacaciones no disfrutadas** (L13) liquidation containing only a **Modalidad de Salario** (51) indicator might be incorrectly generated when the employee combines legal guardianship and absences in the same month, even when there are no **non-taken vacations** (VND) to be reported.
2. You run the report with the **Ejecución productiva** (P_LIVRUN) checkbox selected. Some payroll results are selected but are not reported in the Bases file. To ensure the consistency of the lagged period functionality, those results should be saved in the **Directorio de resultados de nómina utilizados en el TC** (T5EC1), but they are not.
3. When running the report for several employees, a TIME OUT error is occurring due to the long processing time.
4. You run the report for an employee with legal guardianship hours, and one of the following error messages are returned by the Social Insurance in the response file: "**BASES AT. INFERIOR AL MINIMO**" or "**BASES C.C. INFERIOR AL MINIMO**" (C9626).

&SLD (for more information, see SAP Note 1071282)

PC00_M04_CRETA_BASES

Reason and Prerequisites

You have to apply the SAP Note 2259986, which delivers the new class responsible to access the **Campos relevantes por aplicación** (T77PAYES_RELAP) table.

You have to apply the SAP Note 2256985, which delivers the new method SET_CCC_RANGE method for the **Clase para filtro de CCC** (CL_HRPAYES_CCC_FILTER) utility class in order to help applying the **Código de Cuenta de Cotización** (CCC) filter.

1. The report initially adds intervals to an L13 liquidation in order to report legal guardianship hours, which might take to the creation of the I51M indicator as well. Afterwards during the processing, these hours are correctly removed. However, the I51M indicator remains by mistake.
2. This symptom may happen in different situations, for instance:
 - o An unpaid absence during the whole month
 - o A total strike during the whole month
 - o In a month with more than one payroll splits, an additional settlement when there are no difference to report in one of those splits
3. The RPC_PAYES_CRETA_BASES was reading the T77PAYES_RELAP table several times for small groups of data.
4. The RPC_PAYES_CRETA_BASES was not considering the **Permiso sin Sueldo** (SR01) wage type when calculating the **Horas trab. sin decimales** (/3CR) and the **Horas trabajadas en contratos a tiempo parcial** (/3CS) wage types.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 04
6.04	HR SP 76
6.00	HR SP B0

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

1. The report avoids adding legal guardianship hours to L13 liquidations. As a consequence, no I51M indicators are created for this liquidation.
2. Payroll results that were correctly selected but not used to generate the Bases file are now saved in the T5EC1 table.
3. The procedure responsible to read the T77PAYES_RELAP table has been changed in order to avoid unnecessary access to the database.
4. The **Horas trab. sin decimales** (/3CR) and the **Horas trabajadas en contratos a tiempo parcial** (/3CS) wage types are updated in the **Asignación CC-nóminas a CC-nóm.acumulación** (V_T596I) view to consider the **Permiso sin Sueldo** (SR01) wage type.

VERSIONING	
14	SAP Note 2254260 added as pre requisite. No changes have been made in the solution
13	SAP Note 2256985 added as pre requisite. No changes have been made in the solution
12	Released

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.

Manual Pre-Implement.		
VALID FOR		
Software Component	SAP_HRCES	
Release 600	SAPK-600B0I NSAPHRCES - SAPK-600D0INSAPHRCES	
Release 604	SAPK-60476I NSAPHRCES - SAPK-60496INSAPHRCES	
Release 608	SAPK-60804I NSAPHRCES - SAPK-60824INSAPHRCES	

Follow the pre-implementation steps from attached document Manual Instructions for SAP Note 2256718. pdf.
