

Header Data

Released On	19.02.2016 21:53:32
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Legal change

Symptom

As described in Announcement Note 2259680, this SAP Note provides the creation of four new wage types (/164, /424, /A14, /Z14) and the necessary changes to **Cálculo de retenciones e ingresos a cuenta del IRPF** (EST00) payroll function to calculate the taxable basis and tax retention amounts for **Work Incapacity Benefits** (Prestaciones de Incapacidad Laboral Abonadas) which will be reported by Model 190 program on keys A and B subkey 02.

For more information, see also <https://www.boe.es/boe/dias/2015/11/18/pdfs/BOE-A-2015-12436.pdf> or <http://www.agenciatributaria.es/>. Prestaciones; EST00; A02; B02;

Reason and Prerequisites

The present changes have been required due to legal changes.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 05
6.04	HR SP 77
6.00	HR SP B1

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

This SAP note provides the creation of four new wage types:

- **/164 - BI Prestaciones:** Taxable basis amount for Work Incapacity Benefits;
- **/424 - IR Prestaciones:** Tax retention amount for Work Incapacity Benefits;
- **/A14 - Flujo /164 en RR mes:** Flow of /164 wage type in retrocalculation month;
- **/Z14 - Flujo /164 mes anterior:** Flow of /164 wage type of previous month;

The /164 wage type is also the accumulation class 64. In this note is delivered as standard behavior that the wage types for Work Incapacity Benefits (PA10, PA20 and PA40) have the accumulation class 64 checked. It is extremely important that you customize your own Work Incapacity Benefits wage types to have the accumulation class 64 checked.

For the correct operation of the system, it is mandatory that you customize the processing class 70 of the /164 wage type with the same configuration of /151.

Corrections to source code of EST00 payroll function have been provided to generate the wage types. It is important to mention that the /164 wage type follows the same behavior of other basis wage types, generating flow wage types in case of retrocalculation.

Transition Period

During the transition period, while in a retrocalculation you have the /164 created in your system but it did not exist when the your previous payroll result was run, the actual payroll result will contain a /164 wage type with the Work Incapacity Benefits amount of the previous result and the difference between the previous and actual results will be generated in a flow wage type (/A14). Follow below an example of how it will work:

Previous Result		Actual Result	
PA10	200,00	PA10	300,00
PA40	800,00	PA40	800,00
		/164	1.000,00
		/A14	100,00

VERSIONING	
1	Released

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

- 1. Apply the manual pre-implementation steps.
- 2. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
