

## Header Data

Released On	21.01.2016 16:50:37
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

## Symptom

Currently some scenarios with **Periodo desfasado** (SPDES) customer situation active may not generate complementary settlements when they should be generated when you execute the **SLD: fichero de bases** (RPC\_PAYES\_CRETA\_BASES) report.

## Other Terms

&PDESASFASADO; &SLD (for more information, see SAP Note 1071282)

PC00\_M04\_CRETA\_BASES.

## Reason and Prerequisites

The issue is caused by a program error.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 04
6.04	HR SP 76
6.00	HR SP B0

(For more information, click on "R/3 HR Support Package Schedule" in [www.service.sap.com/ocs-schedules](http://www.service.sap.com/ocs-schedules).)

## Solution

Corrections to source code of CL\_HRPAYES\_LAGGED\_PERIOD have been provided to solve this issue. The method FILTER\_RGDIR\_COMPLEMENTARY has been created in the **Clase de lectura de nómina para período desfasado** (CL\_HRPAYES\_LAGGED\_PERIOD) class in order to determine which payroll results should be taken into account when running the **SLD: fichero de bases** (RPC\_PAYES\_CRETA\_BASES) report in the complementary (**complementaria**) execution mode.

This is the criteria to filter payroll results when executing in the **complementaria** mode:

1) When SPDES is not active, the payroll results whose for period (FAPER) is before the first for period with payroll results in the given in period will not be considered.

For example, consider the following payroll results:

In period	For period	SEQNR
03.2016	03.2016	0004
03.2016	02.2016	0003
02.2016	02.2016	0002
02.2016	01.2016	0001

If you run the RPC\_PAYES\_CRETA with In period = 03.2016 and **Periodo de Liquidación** = 01.2016 - 03.2016, the payroll result with SEQNR = 0001 will not be taken into account, because the earliest for period with payroll results in the given in period (03.2016) is 02.2016 (i.e., the one with SEQNR 0002).

2) When SPDES is active, **Directorio de resultados de nómina utilizados en el TC** (T5EC1) table will be used to compare what has been sent previously with the current payroll results.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [service.sap.com/note-assistant](https://service.sap.com/note-assistant).
