Symptom

You run the **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report using the **Cód. cuenta de cotización** (S_CCC) selection option in order to filter the selected employees. Then, employees with CCC values different to the ones you have selected may be included in the file generated by the program.

Other Terms

&SLD (for more information, see SAP Note 1071282)

PC00_M04_CRETA_BASES, CCC Secundario, Filtro CCC.

Reason and Prerequisites

This SAP Note delivers a new possible behavior to execute the RPC_PAYES_CRETA_BASES report.

Before the delivery of this SAP Note, when you used the S_CCC selection option for a **CCC** value that has one or more secondary **CCC** values configured in **Divisiones y subdivisiones de personal** (T5E01) or **Características dependientes del tiempo de CCCs** (T5E08) tables, the RPC_PAYES_CRETA_BASES report would always select employees with the primary or secondary **CCC** values.

You have to apply SAP Note 2303949 as prerequisite.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 07
6.04	HR SP 79
6.00	HR SP B3

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Corrections to source code of RPC_PAYES_CRETA_BASES have been provided to solve this issue. The **Sin CCC asociados** (P_NOCCC2) flag has been created in order to enable to select exactly the **CCC** values that match the S_CCC selection option, excluding the secondary CCC.
