

Header Data

Released On	25.04.2016 21:09:43
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	<div>PA-PA-ES Spain</div> <div>XX-CSC-ES-PY Payroll</div>
Priority	Correction with medium priority
Category	Correction of legal function

Symptom

You have configured the **Campos relevantes por aplicación** (V_T77PAYES_RELAP) view to split intervals for fields of the **Datos de mensaje AFI** (0799) infotype when running the **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report, but the intervals are being split incorrectly.

Other Terms

&SLD; (for more information, see SAP Note 1071282)

RPC_PAYES_CRETA_BASES

Reason and Prerequisites

The issue is caused by a program error. The 0799 infotype table is read with the 'HR_READ_INFOTYPE' function module which sorts the entries by primary key, however this makes the 0799 infotype entries being out of order chronologically. This generates incorrect split intervals, because the infotype table is looped through to see if there is a change in the fields values configured in the V_T77PAYES_RELAP view comparing one adjacent entry to another. Therefore, the entries should be sorted chronologically and those entries with a rejected status (PA0799-STAFI = 4) should not be considered for the intervals to be split correctly.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 07
6.04	HR SP 79
6.00	HR SP B3

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Corrections to the source code of the RPC_PAYES_CRETA_BASES include have been provided to solve this issue.

From now on, the 0799 infotype table will be sorted by **Fin de la validez** (ENDDA), **Inicio de la validez** (BEGDA), and **Identificación de objeto** (OBJPS) fields, in this order, and entries with a rejected status will not be used to split the intervals.

Version	Date	Reason
2	25.04.2016	Released for Customer
1	19.04.2016	Pilot release

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
