

## Header Data

Released On	01.04.2016 20:45:11
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

## Symptom

The following symptoms have been identified in the **SLD: fichero de bases** (RPC\_PAYES\_CRETA\_BASES) report:

1. You run the report for an employee with an absence and a relapse related to this absence in the same period. The generated file contains overlapping contribution intervals causing the file to be rejected by Spanish Social Insurance.
2. You run the report for an employee with part-time contract, who has **TOTAL ERE** within the month. The generated file contains an incorrect amount of hours in the active contribution interval.
3. You run the report for an employee with an absence and a payroll split during the absence period. The generated file contains overlapping contribution intervals causing the file to be rejected by Spanish Social Insurance.

## Other Terms

&SLD; (for more information, see SAP Note 1071282)

PC00\_M04\_CRETA\_BASES; absentismo; recaida; tramos solapados;

## Reason and Prerequisites

1. This issue occurs independently of the value configured for **Det. BR diaria, recaida** (SBRRE) situation in the **Asignación de opciones a situaciones** (V\_T5EU3) view. The RPC\_PAYES\_CRETA\_BASES report was not merging correctly the absences read from **Absentismos** (AB) table into contribution intervals.
2. After applying SAP Note 2285550 the RPC\_PAYES\_CRETA\_BASES does not generate the correct amount in the concept hours.
3. RPC\_PAYES\_CRETA\_BASES is not merging correctly two payroll results into a single contribution interval when this contribution is related to an absence.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 07
6.04	HR SP 79
6.00	HR SP B3

(For more information, click on "R/3 HR Support Package Schedule" in [www.service.sap.com/ocs-schedules](http://www.service.sap.com/ocs-schedules).)

## Solution

1. The RPCPAYES\_CRETA\_CONTRIB\_C\_CIMP class include has been updated.  
When SBRRE situation has value **BR mes anterior al abs. Original** (00): the correct **Flecha sobre absentismos** (ABZNR) is maintained when merging two or more absences and a new contribution interval is created only for merged absences with the same original begin date.  
When SBRRE situation has value **BR mes anterior abs. Actual** (01): A new method has been created to merge consecutive contribution intervals that are related to an absence relapse.
2. The RPCPAYES\_CRETA\_PAYDATA\_CIMP include has been changed to avoid always ignoring **TOTAL ERE** absences.
3. The RPCPAYES\_CRETA\_PAYDATA\_CIMP include has been changed to merge correctly the contribution intervals from both payroll results.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [service.sap.com/note-assistant](https://service.sap.com/note-assistant).
