Symptom

You run the **Mensaje de Afiliación** (RPCAFIE0) report for an employee with a strike (**huelga**) with no end date defined (i.e., P2001-ENDDA = '31.12.9999'). The report generates two incorrect entries in the **Datos de mensaje AFI** (0799) for this scenario: i) a partial strike (**huelga parcial**) entry with begin and end dates equal to the strike's beginning and ii) an entry with no begin and end dates - which actually causes an error message in the RPCAFIE0 execution log.

Reason and Prerequisites

The issue is caused by a program error. The **Días de absentismo** (P2001-ABWTG) field was being used in order classify the strike as total or partial. However, for these cases of total strikes with no defined end date, the report was considering it as a partial strike, since P2001-ABWTG is equal to 0.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 08
6.04	HR SP 80
6.00	HR SP B4

Solution

Corrections to source code of RPCAFIE0 report have been provided to solve this issue. Now the report will generate only one new entry of 0799 infotype, indicating that it is a partial strike and the strike's beginning.

Version	Date	Reason
2	05.05.2016	Released for Customer
1	02.05.2016	Pilot release

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
