

Header Data

Released On	09.05.2016 22:29:28
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

Symptom

You are running **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report for a partial-time employee with complementary hours (horas complementarias). When generating an additional settlement (complementaria), the file presents intervals with **Numero de horas complementarias** (H02) concept even when employee do not have **Horas Complementarias** (C537) concept related to the **H. extras complem. TP** (/124) wage type.

Other Terms

&SLD; (for more information, see SAP Note 1071282)

Horas complementarias; H02; C537;

Reason and Prerequisites

The issue is caused by a program error.

The resulting concepts are calculated comparing the previous (P) and actual (A) payroll results. If the payroll results compared do not have a difference in the **H. extras complem. TP** (/124) wage type, the RPC_PAYES_CRETA_BASES report do not create a C537 concept.

On the other hand, the H02 concept always report the complete hours. If C537 concept do not exist, the H02 concept should not be created.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 08
6.04	HR SP 80
6.00	HR SP B4

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

Corrections to source code of RPCPAYES_CRETA_INTERVAL_C_CIMP class have been provided to solve this issue. H02 concept will be removed from intervals without C537 concept.

Additionally, the method *remove_complementary_hours* has been removed from RPCPAYES_CRETA_CONTRIBUTION_C_CIMP class. It is not necessary anymore, as the removal of complementary hours is done later.

Version	Date	Reason
3	09.05.2016	Released for Customer
2	22.04.2016	Administrative updates. No changes have been made to the solution delivered
1	14.04.2016	Pilot release

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.

Validity

Software Component	From Rel.	To Rel.	And Subsequent
