Solution

Changes to class CL_HRPADES_SH_SLD

- Method DELETE_ENTRY:

As described in SAP Note 2288293 (SH: Incorrect entry status in the Status Handler (3393) infotype), the **Liquidación ordinaria generada** (003) and **Liquidación complementaria generada** (004) statuses have a precedence over the others. The DELETE_ENTRY method is responsible for eliminating the statuses with lower precedence from the insertion buffer.

This SAP Note adds the **Código de Cuenta de Cotización** (CCC) to the criteria for eliminating statuses with lower precedence. This means that, even though the 003 and 004 statuses have higher precedence, the other statuses will not be eliminated in case they have a different CCC. See SAP Note 2324114 (SLD: Multiple statuses handled for the same employee in SLD Bases) for further information.

- Method GET_ENTRY

When running the RPC_PAYES_CRETA_BASES report, the Status Handler framework records one single status per employee and period. The GET_ENTRY method is responsible for avoiding the recording of multiple statuses.

This SAP Note adds the CCC to the criteria used to avoid the recording of multiple statuses. This means that, multiple statuses can be recorder per employee in the same month as long as they have different CCCs. See SAP Note 2324114 (SLD: Multiple statuses handled for the same employee in SLD Bases) for further information.

Changes to the content of view V_T77PADES_SHST

The following statuses had the **Indicador de estado final** (STATUS_FIN) and/or **Sobrescribir estado final** (STATUS_OVW) checkboxes cleared:

- 002: **Reservado**
- 004: **Liquidación complementaria generada**

- 005: **Empleado con cuotas fijas sin bases a reportar**
- 006: **Empleado exento sin bases a reportar**
- 007: **Empleado sin diferencias retroactivas**

These statuses can be overwritten by any time in case of retroactive calculation and processing of additional settlements.
