## Symptom

You are running the **Cálculo de nómina española** (RPCALCE0) report for a part-time employee that works according to the work schedule (HOCON = 100), or according to days (DICON <> 0), and has a temporal illness (IT). After the implementation of the SAP Note 2248282, the number of days used to calculate the benefits (*prestaciones*) amount changes in a retroactive run of the report.

## Other Terms

&CALC - PC00\_M04\_CALC (for more information, see SAP Note 1071282)  
BRDTP; BRD; Enfermedad laboral; Incapacidad temporal; Tiempo parcial;

## Reason and Prerequisites

You have applied SAP Note 2248282.

The SAP Note 2248282 solution is not linked with the activation of the **Cálculo de BRD para tiempo parc.** (BRDTP) customer situation. Therefore, even if you do not have the BRDTP activated, the benefit days may be changed retroactively from worked days to natural days.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 10
6.04	HR SP 82
6.00	HR SP B6

(For more information, click on "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

Now, the activation of the SAP Note 2248282 is linked with the BRDTP customer situation. Therefore, the report will use worked days or natural days to calculate the benefits amount taking into consideration the BRDTP customer situation configuration.
