

Header Data

Released On	24.06.2016 18:23:16
Release Status	Released for Customer
Component	PY-ES Spain
Other Components	PA-PA-ES Spain XX-CSC-ES-PY Payroll
Priority	Correction with medium priority
Category	Correction of legal function

Symptom

You run the **SLD: fichero de bases** (RPC_PAYES_CRETA_BASES) report for an employee with an absence relapse and face one of the following symptoms, related to the **Det. BR diaria, recaída** (SBRRE) customer situation in the **Asignación de opciones a situaciones** (V_T5EU3) view:

1. You have the SBRRE customer situation set to **BR mes anterior al abs. Original** (00) value. An employee has an absence relapse in the beginning of a month and another absence later in the same month. One of the concepts of the first absence is not generated.
2. You have the SBRRE customer situation set to **BR mes anterior abs. Actual** (01) value. An employee has a temporal incapacity and then a relapse to a prolonged temporal incapacity. The file is generated with overlapped contribution intervals (tramos).

Other Terms

&SLD (for more information, see SAP Note 1071282)

PC00_M04_CRETA_BASES, SBRRE

Reason and Prerequisites

1. The issue is a side effect of the solution delivered by SAP Note 2057877 (CRETA: General Corrections IV (Version I)). When a new contribution object is created for the absence relapse, the original contribution object is deleted. The issue happens when there are subsequent absences in the same month and its contribution objects are also deleted.
2. The issue is a side effect of the solution delivered by SAP Note 2292059 (SLD: Corrections for employees with ERE and absences). Two consecutive contributions are merged due to the relapse, but two other contributions are not merged, leading to overlapping contributions and, thus, overlapping intervals.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 10
6.04	HR SP 82
6.00	HR SP B6

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

Corrections to source code of RPCPAYES_CRETA_CONTRIB_C_CIMP include have been provided to solve those issues.

1. Now only the original contribution objects of the absence relapse are deleted.
2. Now when two contribution objects are not merged, no other contribution objects on the same dates are merged.

Version	Date	Reason
4	June 24, 2016	Released for customer
3	June 10, 2016	Solution 2 updated
2	June 08, 2016	Symptom 2 released
1	June 02, 2016	Pilot release

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.
