Solution

Corrections to the source code of the CL_HRPA_UI_CONVERT_0002_ES and CL_HRPA_INFOTYPE_0002_ES have been provided to solve this issue.

From now on:

1. The VORNA field is mandatory. An asterisk is shown next to the field to indicate it.
2. The GBLND field was changed from editable field with F4 help to a dropdown list. The country key and text are shown.
3. The PERID field cannot be saved blank.
4. The GBLND field may be saved blank, therefore no value will be set if the field is left blank.
