

2322710 - FDI: General corrections 3

Version	4	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	04.07.2016
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2322710>

Symptom

You run the Mensaje FDI (RPCFDIE0) report and the generated Mensaje de documentos del I.N.S.S. (FDI) file is rejected by the Spanish Social Security for one of those reasons:

1. You run the report for a full-time employee with maternity leave absence. The Bases de cotización Maternidad/Paternidad(BMP) segment is generated for the previous 12 months prior to the Datos de mensaje FDI (0768) infotype.
2. The FDI file for a Parte de Alta de I.T. action is rejected because the Fecha siguiente revisión médica field is reported. The FDI file for a Parte de confirmación de I.T. is rejected because the Fecha de baja proceso anterior, or the Fecha de baja proceso inicial, or the Ocupación C.N.O, or the Modalidad de Contrato fields are reported.

Other Terms

&FDI - PC00_M04_MENS_FDI (for more information, see SAP Note 1071282)

Maternidad; Paternidad; ODI

Reason and Prerequisites

1. For full-time employees, the BMP segment should be generated only for the previous month prior to the 0768 infotype entry. The BMP segment will only be generated for the previous 12 months prior to the 0768 infotype entry if the employee is on a part-time journey.
2. The file layout states that those fields are conditional, but does not mention the conditions where they should be reported. In the mentioned cases, those fields should be blank.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 11
6.04	HR SP 83
6.00	HR SP B7

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

1. For full-time employees, the BMP segment is now generated only for the previous month prior to the 0768 infotype entry.

2. The conditions described in the symptom 2 are now evaluated in the file generation, so the indicated fields are blank in those cases.

Version	Date	Reason
4	July 4, 2016	Released for customer
3	June 29, 2016	Symptom 2 updated
2	June 21, 2016	Pilot release of symptom 2
1	May 27, 2016	Pilot release of symptom 1

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
