

2319027 - SLD: Processing files from server in background and log enhancements

Version	3	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Advance development
Release Status	Released for Customer	Released On	20.07.2016
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2319027>

Symptom

The SLD: procesamiento de ficheros (RPC_PAYES_CRETA_FILES) report does not support background execution and scheduled jobs.

Other Terms

&SLD (for more information, see SAP Note 1071282)

PC00_M04_CRETA_FILES

Reason and Prerequisites

You have to apply the following SAP Notes as prerequisites:

- 2332658 (SLD: UDO Report for SAP Note 2319027)
- 2322502 (HCM Log: ALV Grid Cells to be Highlighted With Color)

The report only supports the upload of local files from the user's machine, while background executions require that the files are uploaded to the database server.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 10
6.04	HR SP 82
6.00	HR SP B6

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

This SAP Note provides enhancements to the RPC_PAYES_CRETA_FILES report in order to support the processing of files from server in background.

Logical file path

The Ficheros para cálculo de la nómina (España) (HR_ES_DATASETS) logical file path and SLD: Procesamiento de ficheros (HR_ES_SLD) logical file name have been created in order to map the server location where the files will be uploaded.

Attention: for security reasons, users can only access the server location mapped to this logical file name.

Selection screen

The following radio button has been added to the selection screen:

- Seleccionar fichero servidor (P_FILSRV): choose this radio button when you want to select one single file that was uploaded to the server location configured in the logical file path.

Attention: for security reasons, the search-help (F4) function of the Fichero o directorio (P_INPUT) and Fichero de bases a comparar (P_INBAS) fields is disabled when you choose the new radio button.

Enhancements to calculation file usability

Additionally, this SAP Note delivers enhancements to the Empleados con diferencias log node, which is displayed when you process a Fichero de Cálculos (calculation file) with the Calcular diferencias entre fichero y nómina (P_CDIF) checkbox selected. From now on, differences between the file and the payroll results are highlighted in a cell level in two different collors:

- Red: when the difference between file and payroll is greater than the value set to the Tolerancia comp.fich.calc. SLD (SFC00) constant in the Constantes de nómina (V_T511P) view.
- Yellow: when the difference between file and payroll is lower than the value set to the SFC00 constant in the V_T511P view.

Version	Date	Reason
3	July 20, 2016	Released for customers

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.

List of new/changed objects (manual activities related):

LIMU DOMD HRPAYES_SLD_FILES_INPUT

LIMU REPT RPC_PAYES_CRETA_FILES

R3TR CDAT FILENAME

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
