Symptom

You have the Período desfasado (SPDES) customer situation set with the SLD activo (03) option in the Asignación de opciones a situaciones (V_T5EU3) view. You run the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report, with the Ejecución productiva (P_LIVRUN) option, in order to report liquidation periods before and after SPDES activation. Then, payroll results of periods before SPDES activation are saved in the Directorio de resultados de nómina utilizados en el TC(T5EC1) table.

Reason and Prerequisites

There is no check in the Clase de lectura de nómina para período desfasado (CL_HRPAYES_LAGGED_PERIOD) class to guarantee that only payroll results of periods prior to SPDES activation will be stored in T5EC1 table.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 12
6.04	HR SP 84
6.00	HR SP B8

(For more information, click on "R/3 HR Support Package Schedule" in www.service.sap.com/ocs-schedules.)

Solution

After this SAP Note, it will be checked before storing any payroll result in T5EC1 table if it corresponds to a payroll period after or equal to SPDES activation.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
