## Symptom

When you run the Cálculo de nómina española (RPCALCE0) report, the system is not calculating the Cotización adicional por reducción de la edad de jubilación de los Bomberos (firefighter's contribution due to age reduction for the retirement) in case of extended IT (IT prolongada) absence.

## Other Terms

&CALC; (for more information, see SAP Note 1071282)

## Reason and Prerequisites

The issue is caused by a program error.

The report was using the employee's Base de contingencias comunes (Contribution base) amount to calculate the additional firefighter's contribution amount, but in case of extended IT absence this contribution base is zero.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 14
6.04	HR SP 86
6.00	HR SP C0

(For more information, click on "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

Corrections to source code of RPCS96E0 have been provided to solve this issue.

From now on, the system will use the employer's Base de contingencias comunes (Contribution base) amount to calculate the additional firefighter's contribution amount. This is only applied to the employer's contribution base.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [service.sap.com/note-assistant](http://service.sap.com/note-assistant).
