## Symptom

In the Datos de mensaje FDI (0768) infotype, the Contingencia (0768-CONTY) field is set to mandatory when the Estado reporte (0768-REACT) field has the value No Reportable (1).

Additionally, when processing a response file in the Evaluación de respuestas a los mensajes FDI (RPUFRIE0) report, the 0768 infotype is not updated when processing an action that does not require the CONTY field to be filled, and the report returns the following error: "No se pudo bloquear el infotipo 0768 para su actualización".

## Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2267485.

The 0768-CONTY field is not mandatory when the 0768-REACT field has value 1.

Also, the CONTY field is not mandatory for the Anotación de Certificado de Maternidad (ACM), Eliminación de Certificado de Maternidad (ECM), Anotación de Certificado de Paternidad (ACP), and Eliminación de Certificado de Paternidad (ECP) actions. Therefore, when processing a response file in RPUFRIE0 for one of these actions with CONTY field blank, the REACT field is set to No Reportable, and the corresponding entry of the 0768 infotype should be correctly updated.

The following Support Package level is the minimum prerequisite:
