Symptom

The following symptoms have been identified in the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report during the generation of contribution intervals:

1. When an employee ends their multi-employment situation, the contribution interval split is incorrectly generated.
2. A contribution interval split is incorrectly generated when there are changes in the Categoría profesional (P0061-BERKT) field in the Seguridad Social (ES) (0061) infotype.
3. No contribution interval split is generated when there are changes in the Procentaje de tiempo parcial respecto a la jornada habitual (P0061-PTPAR) field.

Reason and Prerequisites
