

2411213 - PDESFAADO: In period not used to filter payroll results in CRA report

Version	4	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	06.02.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2411213>

Symptom

You have the Periodo desfasado(SPDES) customer situation active (that is, set with 1, 2 or 3) and run the CRA: Conceptos Retributivos Abonados(RPC_PAYES_CRA) report with the Rectificación(P_RETIF)or Atrasos (P_ARREAR) options selected and with the Período En igual al período de cálculo de nómina (P_CURRES) payroll filter criteria.

Then, the file generated by the report includes payroll results that were not retrocalculated. This may happen specially in for periods before the activation of SPDES customer situation.

Other Terms

&PDESFAADO; &CRA (for more information, see SAP Note 1071282)

Reason and Prerequisites

The filter that should be applied with P_CURRES option is not being taken into account when SPDES is active. However, this criteria should be observed in for periods prior to SPDES activation when executing RPC_PAYES_CRA report.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 18
6.04	HR SP 90
6.00	HR SP C4

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The criteria specified by P_CURRES option of RPC_PAYES_CRA report is now taken into account when filtering payroll results from for periods prior to SPDES activation. After SPDES activation, the current behavior of selecting payroll result based on the productive execution registered in Directorio de resultados de nómina utilizados en el TC(T5EC1) table will continue being used.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
4	February 06, 2017	Note released to customers.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.

Software Components

Software Component	Release
SAP_HRCES	600 - 600
SAP_HRCES	604 - 604
SAP_HRCES	608 - 608

Correction Instructions
