## Symptom

You run the Cálculo de nómina española (RPCALCE0) report for an employee with multi-employment, non-taken vacation (VND) and a leave action in the month. The report incorrectly calculates Base CC per.IT (split AB) (/3P7) wagetype with a value to be paid by the employee related to the non-taken vacations.

## Other Terms

&PLURIMPLEO; &CALC; (for more information, see SAP Note 1071282)

PC00\_M04\_CALC;

## Reason and Prerequisites

The report is wrongly cumulating values into a table used to control base limits inside a simulation routine.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 15
6.04	HR SP 87
6.00	HR SP C1

(For more information, click on "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

The simulation routine mentioned in the reason section of this note no longer accumulates the values which would incorrectly take effect on /3P7.

Corrections to source code of includes RPCS96E0, RPCS9AE0 and RPCS9ME1 have been provided to solve this issue.
