## Symptom

When you run the CRA: Conceptos Retributivos Abonados (RPC\_PAYES\_CRA) report using the Rectificación (P\_RETIF) option, there are liquidation periods being sent in the generated file even when there is no payroll retrocalculation for such periods.

This issue may happen if you run the RPC\_PAYES\_CRA report for more than one liquidation period.

## Other Terms

&CRA (for more information, see SAP Note 1071282)

PC00\_M04\_CRA

## Reason and Prerequisites

This issue happens due to an error when reading payroll results in the READ\_PAYRESULTS method of Clase de lectura de nómina para período desfasado (CL\_HRPAYES\_LAGGED\_PERIOD) class.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 16
6.04	HR SP 88
6.00	HR SP C2

(For more information, click on "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

Corrections to the source code of the CL\_HRPAYES\_LAGGED\_PERIOD class have been provided to solve this issue. Payroll results read for previous liquidation periods are being now refreshed from the attributes of this class in order to avoid this behavior to happen.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [service.sap.com/note-assistant](http://service.sap.com/note-assistant).
