

2429851 - CPERSONAL: absence symbol for absence relapse set for fewer days than configured

Version	4	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	15.03.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2429851>

Symptom

You run the Generación del Calendario Personal (E) (RPTGENE0) report for an employee with an absence relapse, and the absence symbol is being set to fewer days than configured in the Generación del calendario personal (T5ECP) view.

Other Terms

&CPERSONAL (for more information, see SAP Note 1071282)

Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2145816.

The absence symbols given in the T5ECP table should be assigned correctly given the number of days configured. After SAP Note 2145816, the first new symbol of the absence relapse to be assigned for the absence is being set with one day less (e.g. symbol E should be set for 12 days, while it is currently being set for 11 days).

This happened because when the absence was being processed by the report, the counter of the days for the new symbol was being set as 2 for the first day, causing that the report considered one day less for the symbol.

Example:

The employee has the following absences:

20.12.2016 - 21.12.2016 - Enfermedad no laboral

22.12.2016 - 16.01.2017 - Enfermedad no laboral (relapse from previous one)

The absence symbols are incorrectly assigned as shown in the table:

Year	Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
2016	12																				N	N	N	E	E
2017	01	E	E	<u>1</u>	1	1	1	1	3	3	3	3	3	3	3	3	3								

The absence symbols should be set as the following:

Year	Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
2016	12																				N	N	N	E	E
2017	01	E	E	E	1	1	1	1	1	3	3	3	3	3	3	3	3								

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 19
6.04	HR SP 91
6.00	HR SP C5

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, the day counter is set correctly, and the symbols are being set for the configured number of days.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
4	March 15, 2017	Release for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
