

2440666 - SLD: adjustments in the selection of payroll results when comparing a calc. file with calc. period

Version	2	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	16.03.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2440666>

Symptom

When you execute the SLD: procesamiento de ficheros (RPC_PAYES_CRETA_FILES) report to compare a calculation file against actual payroll results informing a calculation period, the system returns no results. As a consequence, the comparison fails and the system generates a warning message stating that no payroll results were found in the calculation period informed.

Other Terms

&SLD (for more information, see SAP Note 1071282)

Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2412505.

The system may return no payroll results when the Período Desfasado(SPDES) customer situation is active, and there are no entries in Directorio de resultados de nómina utilizados en el TC (T5EC1) table which the main period (T5EC1-PERPR) matches the in period from payroll results.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 19
6.04	HR SP 91
6.00	HR SP C5

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

When reading payroll results for calculation file processing, as of now the system considers all payroll results matching the for period. The Clase de lectura de nómina para período desfasado

(CL_HRPAYES_LAGGED_PERIOD) filters the records relevant for the calculation period provided by using the in period and the main period from T5EC1.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	March 16, 2017	Release for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as

1. Use Note Assistant (SNOTE) to implement the correction

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.

When reading payroll results for a specified calculation period, the system should select results depending on the **Período Desfasado**(SPDES) status, as described below:

Software Components

Software Component	Release
SAP_HRCES	600 - 600
SAP_HRCES	604 - 604
SAP_HRCES	608 - 608

Correction Instructions

Software Component	From	To	Version	Changed on	ID
