

2438726 - 190: Sorting criteria not took into account when merging data of employees with the same NIF but different PERNR

Version	3	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	28.03.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2438726>

Symptom

After implementation of SAP Note 2304666 (190: Merge employees with same NIF and different PERNR), the Informes de I.R.P.F.(RPC190E0) program is always merging employees that have the same N° de identificación fiscal (P0062-CODIM) number with two or more different Número de personal(PERNR) values. After merging the employees, the results are sorted according to the N.I.F.value.

Other Terms

&190 - PC00_M04_C11X, PC00_M04_C190, PC00_M04_CCRI (for more information, see SAP Note 1071282)

Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2304666, which was not taking into account the sorting criteria specified prior to the report execution.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 19
6.04	HR SP 91
6.00	HR SP C5

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The solution delivered by SAP Note 2304666 has been adapted to correctly merge employees with the same P0062-CODIM number and with two or more different PERNR values taking into account the sorting criteria established.

Besides this correction, the customer situation 190: unir empl. con mismo NIF(190MN) has been created to allow customers to decide if they want employees with the same NIF to be merged or not.

There are two possible values for this constant:

- 00 - Unir empleados
- 01 - No unir empleados

The 00 value will keep the RPC190E0 program current behavior of merging employees that have the same NIF and sorting the results using the NIF.

The 01 value will not merge the employees and will keep the results in the same order of processing.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
3	March 28, 2017	Release for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.
