

2442825 - 190: SAPscript deduction certificate quality improvement for fiscal year 2016

Version	3	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	27.03.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2442825>

Symptom

When executing the Informes de I.R.P.F. (RPC190E0) report to generate a Deduction Certificate (Certificado de Retenciones) for fiscal year 2016, the system generates the output document with low quality.

Other Terms

&190 (for more information, see SAP Note 1071282)

Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2417655.

The quality of the background image used by SAPscript does not have the optimal resolution for printing in A4 paper size.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 19
6.04	HR SP 91
6.00	HR SP C5

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The quality of the background image has been raised to 300 DPI. This resolution is sufficient to generate the output document with an appropriate quality.

OBS: some printers may offset the position of the document generated by SAPscript within the media, causing the outer frame not to be printed. You can compensate this offset by adjusting the margins of your printer (see SAP Knowledge Base Article 2447873).

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
3	March 27, 2017	Released for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual implementation steps.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.

Manual Activities

Manual Post-Implement.
