## Symptom

You run the SLD: fichero de bases (RPC\_PAYES\_CRETA\_BASES) report for an employee who becomes active in the middle of the month and the report generates intervals (tramos) for the inactive period.

Example:

The employee has the following actions in the Medidas (0000) infotype:

| Action Type<br>Clase de medida<br>(MASSN) | Start<br>De<br>(BEGDA) | To<br>A<br>(ENDDA) | Employment<br>Ocupación<br>(STAT2) |
|---|------------------------|--------------------|------------------------------------|
| Firing                                    | ...                    | 10.01.2017         | 0 (Withdrawn / Dado de baja)       |
| Rehiring                                  | 11.01.2017             | 31.12.9999         | 3 (Active / Activo)                |

The RPC\_PAYES\_CRETA\_BASES report incorrectly generate intervals for the inactive period.

| Generated intervals  | Expected intervals            |
|--|-------------------------------|
| From 01.01.2017 to 10.01.2017<br>From 11.01.2017 to 31.01.2017 | From 11.01.2017 to 31.01.2017 |

## Reason and Prerequisites

The RPC\_PAYES\_CRETA\_BASES report may not detect this scenario properly.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

| Release | Support Package |
|---------|-----------------|
| 6.08    | HR SP 19        |
| 6.04    | HR SP 91        |
| 6.00    | HR SP C5        |

(For more information, click on "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

From now on, the RPC\_PAYES\_CRETA\_REPORT ensures that no intervals are created during inactive periods.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

| Version | Date           | Reason               |
|---------|----------------|----------------------|
| 2       | March 28, 2017 | Release for Customer |

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.
