

2447864 - FDI: Incorrect sort of entries within the same range of dates

Version	2	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	28.03.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2447864>

Symptom

You execute the Datos de mensaje FDI (0768) infotype and open the Overview (MP076800 3000) Screen (Shift+F8) for an employee which has entries for the same range of dates. The application does not consider the Estado de identificación de objeto (OBJPS) entry to sort the entries.

Other Terms

&FDI; - Transaction (for more information, see SAP Note 1071282)

Reason and Prerequisites

System was sorting the entries ascending for the OBJPS attribute.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 19
6.04	HR SP 91
6.00	HR SP C5

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, system is going to sort the entries using the OBJPS descending.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.
