

2421425 - CRT2: Missing element <NumDiasCotizados> under element <Datos_Cotizacion>

Version	4	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	18.04.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2421425>

Symptom

You run the Certific@2 (RPCRT2E0) report for an employee who has a split in the 31st day of the previous month. The element <Datos_Cotizacion> does not contain the required element <NumDiasCotizados>.

Example:

Employee payroll results:

Period	Begin Date	End Date	Comment
01.2017	01.01.2017	30.01.2017	
01.2017	31.01.2017	31.01.2017	In this payroll result, the /3AC wage type is not generated, because the adjustment to 30 days took place.
02.2017	01.02.2017	28.01.2017	Leave action

The employee has a leave on 02.2017. Therefore, RPCRT2E0 is executed. The report generates an entry for 01.2017 with the element <NumDiasCotizados> missing.

Other Terms

&CRT2 - PC00_M04_RPCRT2E0 (for more information, see SAP Note 1071282)

Reason and Prerequisites

After SAP Note 2221427 (symptom 3), there might be cases where an employee has a payroll split in the 31st day of the month and the result contains contribution bases without days. On this case, the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report gathers the contribution base of the 31st day of the month with the contribution base of the previous payroll split. This behavior must be implementend in RPCRT2E0 as well.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 20
6.04	HR SP 92
6.00	HR SP C6

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

After implementing this SAP Note, the RPCRT2E0 report identifies the presence of a payroll split in the 31st day with contribution base and no days. On this case, it avoids the generation of empty elements < NumDiasCotizados> and gathers the contribution base of the 31st day with the previous result.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
4	April 18, 2017	Released for customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
