

2415441 - AFI: leave movement is not being generated when using the Automatismos option

Version	2	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	17.02.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2415441>

Symptom

You run the Mensaje de Afiliación (RPCAFIE0) report with the Automatismos (S_AUTOM) option. If there is a leave action to be reported, the report is not generating a leave movement when the Fecha inicio período selección de datos (PNPBEGDA) is the same date as the leave action.

Example:

Leave action - 01.07.2016 - 31.12.9999

Dates in the Período selección datos in the report screen: 01.07.2016 - 31.12.2016

A movement with Acción a nivel trabajador (P0799-ACCAF) equal to Baja (MB) should be generated for 30.06.2016, one day before the leave action, but the report is incorrectly not generating it.

Other Terms

&AFI (for more information, see SAP Note 1071282)

Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 1464296.

The report is not generating movements for a date before the begin date in the PNPBEGDA. However, an MB movement should be reported to the Social Security with a date one day before the leave action.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 18
6.04	HR SP 90
6.00	HR SP C4

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, the report will identify leave actions and report them with date equal to one day before the action date, even when the begin date in the report screen has the same date as the leave action.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	February 17, 2017	Released for customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under service.sap.com/note-assistant.
