Symptom

In the Retenciones (ES)(IT0887) infotype, when using the search help in Clave de Receptor (P0887-EMFSL) field, the system brings incorrect data when there are delimited entries in the Clave de receptor(T521B) table.

Other Terms

HR Renewal

Reason and Prerequisites

The search help displays the data of the oldest record because it does not consider the delimited entries in T521B.

This SAP Note is relevant only for Spain.

You have to apply SAP Note 2541125 as prerequisite.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
EA-HRCES 608	HR SP 27
EA-HRCES 607	HR SP 50
EA-HRCES 606	HR SP 61
EA-HRCES 605	HR SP 76
EA-HRCES 604	HR SP 99
EA-HRCES 603	HR SP A7
EA-HRCES 602	HR SP B2
EA-HRCES 600	HR SP D3

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, the system will consider the delimited entries in T521B to display the search-help in P0887-EMFSL.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.
