

2542896 - 190: Corrections to RX00 and RX30 containers from V_T5EU1 view

Version	1	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	03.10.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2542896>

Symptom

You have duplicated entries for the RX00 and RX30 containers in the Contenedores de resultado de nómina (V_T5EU1) view. This duplicated customizing may lead into duplicated amounts of base and reduction for irregular incomes being reported by the Informes de I.R.P.F. (RPC190E0) program.

Other Terms

&190 - PC00_M04_C11X, PC00_M04_C190, PC00_M04_CCRI (for more information, see SAP Note [1071282](#))

Rendimientos irregulares, Contenedores

Reason and Prerequisites

The V_T5EU1 entries delivered by SAP Note 2332872 (IRPF: Irregular Incomes paid in kind are being wrongly reported) through Support Package did not contain a zero in the beginning of the sequence number (i.e. 1, 2, 3), although the manual steps from the same SAP Note indicated that these entries should be created with a zero in the beginning of the sequence number (i.e. 01, 02, 03).

If a customer applied SAP Note 2332872 manually creating the V_T5EU1 entries with the sequence number starting with a zero, and later applied a Support Package that contained these entries, both the RX00 and RX30 containers will have duplicated entries.

This SAP Note is relevant only for Spain.

This issue is a side effect caused by the solution delivered by SAP Note 2332872.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 27
6.04	HR SP 99

6.00

HR SP D3

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

Entries for both the RX00 and RX30 containers that do not have a sequence number starting with a zero were deleted, while entries that do have a sequence number starting with a zero were kept.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
1	October 03, 2017	SAP Note released for customers

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual implementation steps.

List of created (C) / modified (M) objects (manual activities related):

(M) R3TR VDAT V_T5EU1

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
