

2457794 - SLD: corrections to file generation and 3393 infotype status when using the option to report liquidations in the same file

Version	5	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	26.05.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2457794>

Symptom

You run the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report with the Informar L13 en el mismo fichero de otras liquidaciones (P_GTHLIQ) option selected. Among the selected employees, one is included only in an L13 liquidation. This employee is reported in a separated file, not in the same file as expected.

Also, if the Grabar estados en infotipo 3393 (P_SAVESH) option is used, the Liquidación en plazo generada (003) status is not being saved in the Gestión de Estados (3393) infotype.

Other Terms

&SLD - PC00_M04_CRETA_BASES; (for more information, see SAP Note [1071282](#))

Status handler; Infotype 3393

Reason and Prerequisites

The report is not able to find the correct file for an L13 liquidation when an employee does not have any other liquidation to report.

Also, if the employee has L13 and other liquidations gathered in a single file or only an L13 liquidation, when generating the relevant statuses for the 3393 infotype, not all liquidations relevant in the merged file were being processed. This is a side-effect from SAP Note 2404790.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 21
6.04	HR SP 93
6.00	HR SP C7

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The L13 liquidations are gathered in another file after all employees are processed, ensuring the correct file creation.

Also, when merging liquidations in the same file, all liquidations in the file that are relevant for the 3393 infotype will be processed, ensuring the correct generation of the statuses.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
5	May 26, 2017	Released for Customers

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.
