

2459907 - AFI: partial strike with Indicador de día anterior causes incorrect dates calculation when using the Automatismos option

Version	3	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	23.05.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2459907>

Symptom

When running the Mensaje de Afiliación (RPCAFIE0) using the Automatismos (S_AUTOM) option for an employee who has huelgas notificadas in Absentismos (2001) infotype, subtype 4000 with Indicador de día anterior (P2001-VTKEN), the report is not generating the start and end dates correctly.

Example:

Consider an employee who has a partial strike (huelga parcial) on 10.04.2017, starting at 00:00 until 2:00. For this case, the flag VTKEN is checked.

Also, he has another strike on 13.04.2017 starting at 10:00 until 12:00, which does not have the flag VTKEN checked.

Currently, the report generates the following results:

Nº Pers.	Acción	Desde	Hasta	
162	MIN	10.04.2017	10.04.2017	start date of the strike
162	MIN	11.04.2017	11.04.2017	end date of the strike
162	MIN	13.04.2017	13.04.2017	start of the second strike
162	MIN	14.04.2017	14.04.2017	end of the second strike

However, the report should consider the strike as have started in the previous day, along with the absence flag.

So, the spected results are the following:

Nº Pers.	Acción	Desde	Hasta	
162	MIN	09.04.2017	09.04.2017	start date of the strike
162	MIN	10.04.2017	10.04.2017	end date of the strike
162	MIN	13.04.2017	13.04.2017	start of the second strike
162	MIN	14.04.2017	14.04.2017	end of the second strike

Reason and Prerequisites

This issue happens because the AFI report does not consider the VTKEN flag properly to generate the entries of start and end dates of the strikes.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 21
6.04	HR SP 93
6.00	HR SP C7

(For more information, click on "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

From now on, when the report is checking the relevant strikes for the AFI generation, it tests the VTKEN field directly to generate correctly the strike start and end dates.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. If this is the case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
3	May 22, 2017	Released for Customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under <https://support.sap.com/kb-incidents/notes/assistant.html>.
