| Release Status | Released for Customer | Released On | 12.12.2017 |
| Component | PY-ES (Spain) | | |

Please find the original document at <https://launchpad.support.sap.com/#/notes/2553557>

Symptom

You run the Evaluación de ficheros del programa de AEAT(RPUIR1E0) report using a Macintosh system and the "Error while transforming the reply XML; read message below: No valid source context supplied" error message is thrown when calling the Transformation to read the XML file uploaded to the program.

Other Terms

&MASSIVE - PC00_M04_RPUIR1E0 (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

For this kind of system, the report may not be able to read special characters. In the case of this XML file, there is an element called <AñoNacimiento>which is not read correctly.

Please note that this may not be noticed on Windows computers.

This SAP Note is relevant only for Spain.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

| Release | Support Package |
|---------|-----------------|
| 6.08 | HR SP 29 |
| 6.04 | HR SP A1 |

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

In order to solve this issue, it is necessary to upload files to the RPUIR1E0 report using the binary mode of Upload a file (HR_99S_UPLOAD) function module. Besides that, when using variables to handle the content of the XML file inside the program, it is preferable to use the XSTRING type instead of STRING. This helps avoiding errors with special characters.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

| Version | Date | Reason |
|---------|-------------------|----------------------------|
| 2 | December 12, 2017 | Note released to customers |

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
