

2571810 - PDESFAADO: Productive run for employees with CCC changes in a liquidation period

Version	2	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	13.12.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2571810>

Symptom

You have an employee with multiple CCCsin a liquidation period. When reporting this employee in the SLD: fichero de bases (RPC_PAYES_CRETA_BASES) report, if you use the Cód. cuenta de cotización select-option to filter the employee's payroll results by the CCC value, the productive executions of the report after the first one show the Ejecución productiva generada previamente:nómina para XXXX.XX ya enviada en XXXX.XX (5E626) error message (although those executions refer to payroll results that were not sent productively before).

Example:

Consider an employee that, for June, is in CCC 28000946435 from 01.06.2017 to 15.06.2017 and, from 16.06.2017 to 30.06.2017 is in CCC 28000946438.

You run the RPC_PAYES_CRETA_BASES for liquidation period 06.2017 using the productive mode and set the CCC filter to include only payroll results from CCC 28000946438. Then, after saving this productive execution, you do the same process to generate the Fichero de Bases for CCC 28000946435. In this moment, the 5E626 error message is thrown.

Other Terms

&PDESFAADO (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

When checking if there was a productive run of liquidation period, the CCC was not being taken into account.

This SAP Note is relevant only for Spain.

This issue is a side effect caused by the solution delivered by SAP Note 2412907.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package

6.08	HR SP 29
6.04	HR SP A1
6.00	HR SP D5

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The CCC value is now taken into account when checking if, for a liquidation period, there has been a previous productive run of the RPC_PAYES_CRETA_BASES report.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	December 13, 2017	Note released to customers

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
