

2535940 - INEMCP: General corrections to RPCOINE0 report

Version	6	Type	SAP Note
Language	English	Master Language	English
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	04.01.2018
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2535940>

Symptom

The following issues have been identified in the Impresión de contratos del SEPE(RPCOINE0) report:

1. The Imprimir copia básica (S_BASCOP) selection screen checkbox value is not provided to the Punto de Ampliación Contratos DAQ del INEM (HR_ES_DAQ_INEM_DEFAULT) BAdI implementation classes.
2. When executing the report for an employee with a contract form different from Contrato de Prácticas, Temporal, de Formación or Indefinido, the report do not finish the process.

Other Terms

&INEMCP (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

This SAP Note is relevant only for Spain.

The first issue occurs because the selection screen parameter is not passed to the DAQ framework.

The second issue is a side effect caused by the solution delivered by SAP Note 2527922. It happens because older contract forms do not follow the same pattern for component names.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 30
6.04	HR SP A2
6.00	HR SP D6

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

To solve the first issue, the S_BASCOP value is passed to CH_MISC method parameter. When implementing a HR_ES_DAQ_INEM_DEFAULT BAdI, you can use this parameter to verify if it is a basic copy execution or not.

To solve the second issue, changes to BUILD_DAQ_NODE method, from CL_HR_ES_COINEM_DATA_PROVIDER class, were made. The unnecessary DO statement was removed.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
6	January 04, 2018	Released for customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).

Software Components

Software Component	Release
SAP_HRCES	600 - 600
SAP_HRCES	604 - 604
SAP_HRCES	608 - 608

Correction Instructions

Software Component	From	To	Version	Changed on	ID
SAP_HRCES	608	608	3	04.01.2018 20:34:55	0000236230
SAP_HRCES	604	604	1	04.01.2018 20:38:29	0000301205
SAP_HRCES	600	600	1	04.01.2018 21:12:59	0000301206

Other Components

Component	Description
PA-PA-ES	Spain
XX-CSC-ES-PY	Payroll

Prerequisites

Software Component	From	To	SAP Note/KBA	Title	Component
SAP_HRCES	600	600	2527922	INEMCP: General Corrections	PY-ES
