Symptom

You run the SLD: fichero de bases(RPC_PAYES_CRETA_BASES) report using the Cód. cuenta de cotización (S_CCC)filter and you do not check the No incluir CCCs secundarios en el procesamiento (P_NOCCC2) option. Then, the program may include employees whose CCCdoes not match the filter specified.

Other Terms

&SLD - PC00_M04_CRETA_BASES (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

If exempt employees are processed by the report with blank CCC, an initial CCC value is passed to the Clase para filtro de CCC (CL_HRPAYES_CCC_FILTER) class. This may cause a validation error, making the report consider any CCC available a secondary CCC of the blank one.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 30
6.04	HR SP A2
6.00	HR SP D6

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

For any given CCC range, the CL_HRPAYES_CCC_FILTER class has been adapted to consider an initial CCC value always contained in this range. However, this initial CCC will not be considered a secondary CCC of primary one.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
