## Symptom

You run the Cálculo de nómina española (RPCALCE0) program with the IGA: cálculo de no atrasos(IGANA) customer situation set to Cálculo por regla EGNA(01) for an employee triggering a retrocalculation of a previous payroll period that contains tax estimation wage types with the Importe por unidad (BETPE) and Cantidad(ANZHL) fields filled. The content of these fields is being duplicated for the tax estimation wage types.

Example:

An employee has the following payroll result for January of 2017:

Wage Type	Description	BETRG	BETPE	ANZHL
/11A	Salario bruto	3500.00	10.00	50.00
/11C	Variables variables	150.00	0.00	0.00

In February of 2017, the payroll of January is retrocalculated changing its result to:

Wage Type	Description	BETRG	BETPE	ANZHL
/11A	Salario bruto	3500.00	20.00	100.00
/11C	Variables variables	150.00	0.00	0.00

## Reason and Prerequisites

This issue is a side effect caused by the solution delivered by SAP Note 2488986.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 30
6.04	HR SP A2
6.00	HR SP D6

(For more information, click "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

## Solution

The IGA: Recuperación de CC-nóminas generadas por la EGNA para retrocalc. (EIGA2) payroll function has been changed to not use the BETPE and ANZHL fields from the tax estimation wage types when retrieving the wage types generated by the EGNA rule in the original result.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	January 15, 2018	SAP Note released for customers

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
