Please find the original document at <https://launchpad.support.sap.com/#/notes/2538314>

Symptom

When a data record of an infotype view is missing, you may encounter a dump when trying to display/change/create the corresponding infotype. In this case, report Regeneration of Additional ITs for Views (RPUPAV00) can be used to generate the missing records.

However, currently RPUPAV00 is not enhanced for the Spain (Molga 04) country version.

After you apply this SAP Note, you can use report RPUPAV00 to generate data record for the following Spain infotype views:

- Infotype view V480

Reason and Prerequisites

The RPUPAV00 program is not enhanced for the Spain country version.

This SAP Note is relevant only for Spain.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 28
6.04	HR SP A0
6.00	HR SP D4

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The Implementación: Creación de vistas de infotipos de España(CL_HRPADES_RPUPAV00_NATIONAL) class was created to implement the Crear vistas de infotipo específicos de país (HRPAD_B_RPUPAV00_NATIONAL) BAdI.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
3	November 15, 2017	SAP Note released for customers.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
