

2527939 - IGA: Variables variables from previous years being taken into account twice if month has off cycle payroll result

Version	2	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	16.11.2017
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2527939>

Symptom

When you run the Cálculo de ingresos gravables anuales (RPIGA0E0) program with the Con result. ant. c/mes inicial (S_REA_IN) or Con result. ant. s/mes inicial (S_REA_EX) parameters selected, the program might duplicate the amount from wage types customized in the Estimación de los ingresos anuales (V_T5E37) view if there are off-cycle payroll results for the current year.

Other Terms

&IGA - PC00_M04_RPIMBIE0 (for more information, see SAP Note [1071282](#))

Reason and Prerequisites

This issue happens because payroll results from the previous year are processed twice when the current year has off-cycle payroll results.

This SAP Note is relevant only for Spain.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 28
6.04	HR SP A0
6.00	HR SP D4

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The V_T5E37 entries will not be processed for previous results anymore during the processing of current year off-cycle results.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	November 16, 2017	SAP Note released for customers.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
