## Reason and Prerequisites

This SAP Note is relevant only for Spain.

You have to apply SAP Notes [2343505](#), [2524033](#) and [2562860](#) as prerequisite.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 28
6.07	HR SP 51
6.06	HR SP 62
6.05	HR SP 77
6.04	HR SP A0

## Solution

The fields added to infotype 0090 help you define which entries should be taken into account when you execute the Informes de I.R.P.F. (RPC190E0) and Cálculo de ingresos gravables anuales (RPIGA0E0) reports. These fields have the following behavior:

- Relevante para modelo de declaración (P0090-TAX\_FORM\_FILTER): indicates a tax form or a combination of tax forms for which the information of the 0090 infotype entry is valid when you execute the RPC190E0 report.
- Persona jurídica (P0090-JURIDIC\_PERSON): indicates a legal person number for which the information of the infotype entry is valid when you execute the RPC190E0 report.
- Relevante para estimación de impuestos(IGA) (Q0090-RELEVANT\_FOR\_IGA\_SCREEN): indicates that the infotype information is valid for estimating the employee taxable income when you execute the RPIGA0E0 report.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Apply the manual pre-implementation steps.
2. Use Note Assistant (SNOTE) to implement the correction instructions.
