

# 2602866 - FDI: 0768 infotype entries not processed when employee has more than one 2001 infotype entry for the same day

Version	3	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	21.02.2018
Component	PY-ES ( Spain )		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2602866>

## Symptom

You process a response file in the Evaluación de respuestas a los mensajes FDI (RPUFRIE0) program for an employee that has two absences for the same day of the movement date. If the other absence started before the absence that was reported by the Mensaje FDI (RPCFDIE0) program, then the "No se ha podido actualizar el historial del empleado: XXXXXXXX" message is being displayed and the Datos de mensaje FDI (0768) infotype entry is not processed.

### Example:

An employee has the following absences in the Absentismos (2001) infotype:

Start date	End date	Absence
01.02.2018	08.02.2018	Vacation
08.02.2018	15.02.2018	Non work-related illness

When processing the response file for the non work-related illness absence, the program displays the message described in the symptom.

## Other Terms

&FDI - PC00\_M04\_MENS\_FDI, PC00\_M04\_RESP\_FDI (for more information, see SAP Note [1071282](#) - CONSULT: List of tags for Spain notes)

FRI

## Reason and Prerequisites

This issue happens because the RPUFRIE0 tries to process the first absence it finds for the movement day, which may not be the absence that generated the FDI message.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 31
6.04	HR SP A3
6.00	HR SP D7

(For more information, click "HR Support Packages Schedule" in [support.sap.com/maintenance-schedule](https://support.sap.com/maintenance-schedule))

Solution

From now on, for the scenarios where the employee has more than one entry in the 2001 infotype for the movement date, the RPUFRIE0 program will select the 2001 infotype entry that has a matching entry in the 0768 infotype.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
3	February 21, 2018	Released for customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
