

2630529 - GARNT: Short dump when displaying priority search help

Version	2	Type	SAP Note
Language	Inglés	Master Language	Inglés
Priority	Correction with medium priority	Category	Correction of legal function
Release Status	Released for Customer	Released On	12.04.2018
Component	PY-ES (Spain)		

Please find the original document at <https://launchpad.support.sap.com/#/notes/2630529>

Symptom

When you try to open the Prioridad de la retención (P0887-GMSEQ) search help of the Retenciones (0887) infotype in display mode, a short dump occurs.

Other Terms

&GARNT (for more information, see SAP Note [1071282](#) - CONSULT: List of tags for Spain notes.)

Reason and Prerequisites

The issue occurs because the Clave datos maestros de personal (PSKEY) structure is not properly initialized in display mode.

Good to know: when you install an SAP Note, some prerequisites might be required. The prerequisites are SAP Notes that were already released and that change the same context of the current SAP Note. So, even if these prerequisites are not necessarily related to the symptom of the current SAP Note, you should implement them due to technical reasons.

The following Support Package level is the minimum prerequisite:

Release	Support Package
6.08	HR SP 33
6.04	HR SP A5
6.00	HR SP D9

(For more information, click "HR Support Packages Schedule" in support.sap.com/maintenance-schedule)

Solution

The 0887 infotype code has been changed to proper initialize the PSKEY structure in display mode.

Good to know: during the piloting phase, this SAP Note may be updated and versioned depending on feedback from pilot customers. After this SAP Note changes to status Released for Customer, it will not be changed anymore, unless there is a very specific situation that demands changes. In this case, a reason for the change will be specified in the SAP Note.

Version	Date	Reason
2	April 12, 2018	Release for customer

As a general rule, SAP recommends that you install a solution by applying a Support Package. However, if you need to install the solution earlier, proceed as follows:

1. Use Note Assistant (SNOTE) to implement the correction instructions.

You can find more information about the Note Assistant in SAP Service Marketplace, under [SAP Note Assistant](#).
